Brian, attached are all the files I couldn't find earlier for the USACE dredging permits. They were being directed to another folder.

Caveats: NONE

Dear Mr. Casanova,

Attached is the relevant information concerning the Alamo Concrete proposal for maintenance dredging that I mentioned in my previous email (see below). The location for this proposal is also adjacent to the Falcon Refinery Superfund site. As with the Garrett Construction project, I would appreciate any comments you could offer regarding their proposal.

Sincerely,

Mark P

Classification: UNCLASSIFIED
Caveats: NONE

Dear Mr. Casanova,

Thank you for speaking to me this morning regarding Garrett Construction's proposed maintenance dredging project and the potential impacts on it from the adjacent Falcon Refinery Superfund site. The proposed dredging project was recently placed on Interagency Coordination Notice and received comments from the Texas Parks and Wildlife Department (TPWD) and the U.S. Fish and Wildlife Service. These agencies were concerned about the possibility that pollutants from the Falcon site may have migrated to the Garrett site and could be released into the aquatic environment by Garrett's proposed maintenance dredging. I would appreciate any comments you could offer regarding this scenario and have attached a copy of the coordination notice, plans, an aerial photo from Google Earth, as well as the TPWD comment letter for your information. The Garrett basin is the one in the aerial photo located near the bottom of the photo and just above the Google Earth TM. Please let me know if you need any further information. We have also received a similar project proposal from Alamo Concrete, which is also near the Falcon Refinery site and has received the same concerns from the agencies. I will forward information of this project to you later today. Thank you for all your help.

Sincerely,

Mark Pattillo
Project Manager
